

Shafayet Muntasir

Ann Arbor, MI 48109 | shafam@umich.edu | (586) 945-0709 | <https://www.linkedin.com/in/shafayetmuntasir> | <https://github.com/shafamunt>

EDUCATION

University of Michigan

Ann Arbor, MI

B.S.E. in Computer Engineering. Dean's List. GPA: 3.5.

05/2029

Relevant Coursework: Data Structures, Logic Design, Electricity & Magnetism, Discrete Math, Intro to Programming (C++, MATLAB, Python), Differential Equations

EXPERIENCE

Software Engineering Intern

05/2026 – Present

Darul Uloom Michigan

Warren, MI

- Lead full-stack development of a role-based educational platform in production since May 2026, serving 70+ users across 5 access levels; project ideation began November 2025.
- Architect a PostgreSQL database with 30+ tables, Row-Level Security, and serverless Edge Functions for authentication.
- Establish CI/CD pipelines via GitHub Actions with 75+ automated tests to ensure deployment stability.

Computer Consultant II, Shift Lead

08/2025 – Present

University of Michigan - ITS

Ann Arbor, MI

- Promoted to Consultant II to mentor new staff, deliver peer feedback, and manage advanced customer escalations.
- Resolve hardware and software issues through in-person and virtual technical support across personal and departmental tickets.

PROJECTS

MRacing (Formula SAE Electric)

08/2025 – Present

Vehicle Software, Instrumentation and Powertrain Member

- Prototype a lap-trigger data acquisition system using breadboards and photosensors to detect vehicle passing for lap timing.
- Hold Level 2 High Voltage certification for 600V system maintenance; completed Altium Designer training for PCB layout.
- Contribute to weekly technical design reviews on CAN bus communication and embedded control strategies.

Michigan Embedded Systems Hub (MESH)

01/2026 – Present

Member and Authorized Laboratory User

- Complete workshops on PCB design covering schematic capture, component footprint selection, and board layout.
- Build hardware fabrication skills through hands-on SMT and Through-Hole soldering training.

ENGR 100: Solar Vehicle and Automated Irrigation

01/2026 – 05/2026

Hardware/Prototyping Lead

- Designed and 3D printed a custom chassis to optimize weight and aerodynamics for a solar-powered vehicle.
- Prototyped a moisture-sensing irrigation system integrating sensors with microcontrollers for automated fluid control.

Object-Oriented Card Game Engine

C++

- Built a scalable Euchre simulation demonstrating OOP principles, polymorphism, and modular system design with an AI player.

Radiation Heatmap and Image Processing Engine

MATLAB

- Developed an image processing script using custom matrix filters to ingest, denoise, and render radiation data as HSV heatmaps.

CERTIFICATIONS

- Level 2 High Voltage (600V Systems)
- CompTIA IT Fundamentals Pro
- CompTIA Security Pro

SKILLS

Languages: C++, Verilog, Python, MATLAB, SQL, TypeScript, JavaScript

Hardware & CAD: PCB Design, Altium, Soldering (SMT/Through-Hole), TinkerCAD, PrusaSlicer

Frameworks & Tools: CAN Bus, Git, CI/CD, PostgreSQL, React, Supabase, Vite
