

Shafayet Muntasir

(586) 945-0709 | shafam@umich.edu | linkedin.com/in/shafayetmuntasir | github.com/shafamunt | Ann Arbor, MI

EDUCATION

University of Michigan

Ann Arbor, MI

B.S.E. in Computer Engineering | GPA: 3.5 (Dean's List)

Expected May 2028

- **Relevant Coursework:** Intro to Logic Design (EECS 270), General Physics II (PHYSICS 240), Data Structures & Algorithms (EECS 280), Discrete Math (EECS 203), Differential Equations (MATH 216), Multivariable Calculus (MATH 215).

ENGINEERING & HARDWARE EXPERIENCE

MRacing FSAE (Formula SAE Electric)

Ann Arbor, MI

Vehicle Software & Powertrain Member | C++, Altium, CAN

Aug. 2025 – Present

- Hold Level 2 High Voltage Safety certification to perform maintenance and diagnostics on 600V electric vehicle powertrain systems.
- Wrote firmware for an IR lap trigger, edge-detecting photosensor voltage drops on beam break to timestamp vehicle passing events over CAN bus.
- Completed Altium Designer PCB layout training and participate in technical design reviews on embedded control strategies and vehicle telemetry.

Michigan Embedded Systems Hub (MESH)

Ann Arbor, MI

Authorized Laboratory Member | PCB Design, Altium, SMT/Through-Hole

Jan. 2026 – Present

- Fabricated hardware using SMT and Through-Hole soldering techniques for microcontrollers and sensor breakout boards.
- Designed schematics and multi-layer PCB layouts in Altium Designer, incorporating component footprints and power routing.

Darul Uloom Michigan

Warren, MI

Software Engineering Intern | TypeScript, React, PostgreSQL, Supabase

May 2026 – Present

- Architected a PostgreSQL database with 30+ tables, Row-Level Security, and Supabase Edge Functions for an operational portal serving 70+ users across 5 role levels.
- Established GitHub Actions CI/CD pipelines with 75+ automated test scripts to enforce code quality and deployment stability.

University of Michigan – ITS

Ann Arbor, MI

Computer Consultant II, Shift Lead | Hardware Support, Networking

Aug. 2025 – Present

- Diagnosed complex hardware, OS, and network connectivity issues across university infrastructure while mentoring incoming staff and managing advanced escalations as Shift Lead.

PROJECTS

Solar Vehicle & Automated Irrigation | C++, Sensors, PrusaSlicer

Jan. 2026 – May 2026

- Prototyped an automated irrigation system integrating soil moisture sensors with microcontrollers for fluid regulation.
- Designed and 3D-printed an optimized aerodynamic chassis for a solar-powered autonomous vehicle using PrusaSlicer.

Object-Oriented Card Game Engine | C++, OOP, Dynamic Memory

Jan. 2026 – May 2026

- Engineered a scalable C++ Euchre simulation utilizing virtual functions, dynamic memory, and custom AI logic.

TECHNICAL SKILLS & CERTIFICATIONS

Certifications: Level 2 High Voltage Certification (600V Systems), CompTIA Security Pro, CompTIA IT Fundamentals Pro

Hardware & Protocols: CAN Bus, PCB Design (Altium), SMT/Through-Hole Soldering, Oscilloscopes, Multimeters

Languages: C/C++, Verilog, Python, MATLAB, SQL, TypeScript/JavaScript

Tools & Frameworks: Git, Docker, PostgreSQL, React, Supabase, PrusaSlicer
